DIVERSE LOOPERS

INTERNSHIP REPORT PRESENTATION

ETS Project

Full Stack Internship

Exception Tracking System / Recruiter Verified Workforce Identity

Niyati Mittal

Roll No. 2410031117 | B.Tech CSE

30 April 2026 – 30 July 2026

Niyati Mittal

B.Tech – Computer Science & Engineering

ABOUT THE INTERN

Candidate Profile

Roll Number
2410031117

Institute
IILM University, Greater Noida, U.P.

Programme
B.Tech CSE, Batch 2024–2028

Internship Domain
Full Stack Development — ETS Project

Duration
30 April 2026 – 30 July 2026

ABOUT THE ORGANIZATION

Diverse Loopers

Diverse Loopers is a product-engineering team building internal platform tools and recruiter-facing products. Its flagship internal system, ETS (Exception Tracking System / Recruiter Verified Workforce Identity), gives internal teams a single, transparent view of workflow exceptions, alongside educational initiatives such as the Crash Course project.

Product Engineering

Builds internal tools and recruiter-facing products end to end.

ETS Platform

Internal exception tracking for recruiter workforce identity.

Mentorship-Led

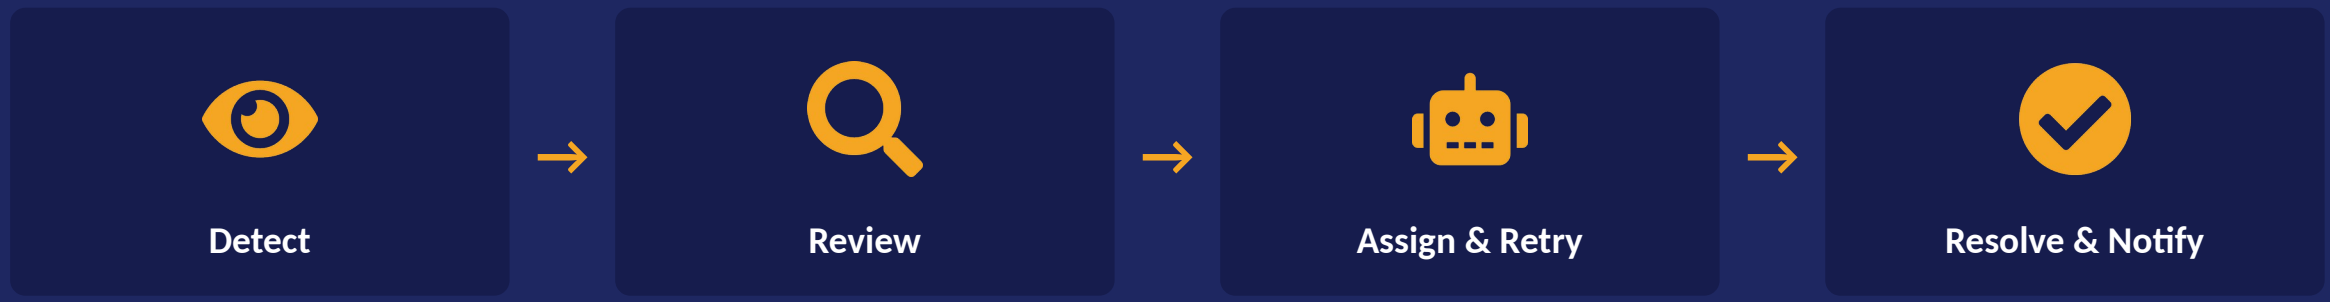

Guided by Ashish Kumar Tiwari, CMGO, throughout the internship.

PROBLEM STATEMENT

From Scattered Exceptions to a Unified Workflow

Internal teams handling exceptions from automated workflows — duplicate identities, database write failures, document upload failures, claim and automation failures — had no single, transparent view of system health. Reviewers lacked a consolidated way to search, filter, assign, and resolve exceptions.

This internship addressed that gap — building the full exception-to-resolution workflow:

PROJECT OBJECTIVES

What the Internship Set Out to Achieve

Dashboard & Metrics

Build the Overview page with system-health metric cards and exception-type breakdown.

Exceptions Management

Search, filter, and manage exceptions by type and status.

Automated Workflows

Inline reviewer assignment, automation retry triggers, and resolution notes.

Data Integration

Merge duplicate-identity data into the exceptions view for faster context.

AI-Assisted Actions

Generate AI summaries for assign, retry, and resolve actions.

Notifications Review

Improve email schema and templates for clearer, actionable alerts.

TECHNOLOGIES & TOOLS

The Toolkit Behind the Internship

React.js

Frontend UI

Next.js

App framework

JavaScript

Core language

Tailwind CSS

Styling

Node.js

Backend runtime

REST APIs

Service layer

PostgreSQL

Database

AI/LLM APIs

Action summaries

SYSTEM ARCHITECTURE

From Data to Resolved Exception

Data Layer	PostgreSQL — exceptions & duplicate_identity tables
Integration Layer	Duplicate-identity fields merged into exception records
Workflow Layer	Assignment, automation retries, resolution with notes
Intelligence Layer	AI/LLM-generated summaries for key actions
Presentation Layer	React/Next.js dashboard — metrics & exception views
Notification Layer	Email schema and templates alert stakeholders

METHODOLOGY

The Project-Based Build Journey

1

Dashboard/Overview

Hero section & system-health metric cards

2

Exceptions Management

Search, filters, reviewer assignment

3

Data Integration

Duplicate-identity data merged into view

4

AI-Assisted Actions

Summaries for assign, retry, resolve

5

Notifications Review

Improved email schema & templates

6

Crash Course Content

PDF notes converted to responsive HTML

7

UI Polish

Responsive fixes across devices

EXPECTED OUTCOMES

Skills & Capabilities Gained

- Ability to design and build an internal, data-driven dashboard from metrics to detailed record views
- Practical understanding of exception-management workflows, including assignment, automation retries, and resolution
- Hands-on exposure to integrating related datasets (duplicate-identity records) into a primary workflow view
- Experience integrating AI/LLM-generated summaries into an operational tool
- Capability to review and improve notification/email schema for clarity and actionability
- A shipped internal dashboard and UI improvements, resulting in a Certificate of Internship from Diverse Loopers

CERTIFICATION

Successfully Completed

Role
Full Stack Intern

Issued By
Diverse Loopers

Duration
30 April 2026 – 30 July 2026

Presented On
01 August 2026

DIVERSE LOOPERS

CERTIFICATE OF INTERNSHIP

This certificate acknowledges your outstanding contribution and dedication during internship, showcasing your commitment to excellence, innovation, and teamwork.

This is proudly presented to

NIYATI MITTAL

on completion of internship for the role of **FULL STACK INTERN** from **30April 2026 to 30 July 2026.**

Presented on
01 Aug 2026

Ashish Kumar Tiwari
CMGO

Thank You
